Empus Loniuctionis vel Oppositiois Terü luminariü: boc est Solis z Lune ad quodcücz tempus cuiuscücz meridiani inuenire. (Tende ad boc inuemendum neces, saria sunt öttuoz. Pzimu est ex tabula elogationis Lune a Sole inuenire media coniuctione: si volueris ve am counctionem vel mediam oppositionem si volueri babere veram oppositione. Secundu est inuentio locoz Solis z Lune tempoze coniuctionis vel oppositionis proposite.

Tertium est inventio duodecime partis longitudinis Solis z Lune. Quar tu est inventio motus Solis z Lune in uno minuto diei: vel in una hoza. Iccirco earum hic primo ponemus propositiones.

Empus Medie Coniuctiois vel Oppositionis Solis z Lune per tabulam ad hoc factam inuentre. TReduc totum tempus pro positum ad viem in qua estimas consu ctione aut oppositione fore prope ad 4 3 2 7 i scom voctrina prius tradita. Quo facto scri, be radice medie elongationis Solis & Lune prius. 2 Deinde intra cum quartize. in tabula medie elongationis Solis 2 Lune virecte eode modo per omnia operando: sicut victum est in ve medijs motibus. Et cum omnes in troitus feceris: z numeros addideris: in eodem tempoze est media coniunctio ad quod operatus es: fi pueniant figna. 6. prescise. Et si tria: in eodem tempore est media oppositio. Si vo non proueniut signa. 6 nec tria prescise: tunc si volue ris inquenire coniuctione: subtrabe illud quod prouenerit de signis. 6 re serva re fidui. Si poluerie oppositionem: subtrabe illud quod provenerit de signie, 3. 2 ferna refidut. Quo facto quere illud refiduti in tabula medie elongationis. z fi fuerint ibi aliqua figna: quere ca in prima linea post lineam numeri, e si prescise totum numeru fignozu z graduu zč.non inueneris:accipe minoze propinquio, rem.z vide numeru feriptu in virecto in linea numeri. quem feribe extra.z fimt vies, serua eos ad partem. Demde subtrabe illud qo accepifti in tabula. f. figna et gradus zc.a numero tuo quem habebas. s.a fignis z gradibus zc. vt scias refi dui. Lum quo intra tabulam eandem. Et fi fint gradus in refiduo: quere cos in prima linea post lincam numeri. z si eos inucneris: illud quod scriptum est in li nea numeri erunt minuta dierum. scribe cos extra post dies prius servatos. Si auté fuerint tot gradus: quon poterint in prima linea inueniri: tunc quere eos

£ 3

in fecunda linea in illa parte vbi eft cifra vl.o.in prima linea: vel minore numer rum propinquiorem.et tunc illud quod scriptum est in linea numeri sunt vies. scribe cos extra sub alijs prius scriptis. Cono facto vide fi aliquid sit residuu subtrabendo illud cum quo intrastianumero tuo, et illud iterum quere in eas dem linea. Et fi in refiduo fuerint gradus et inueneris in prima linea. tuc illud quod scriptum est in linea numeri sunt 2 vierum. Si aute fint tot minuta q in prima linea non poterut inueniri tunc quere ea in fecunda linea: in illa parte in qua est cifra vel.o.in prima linea. et tuc quod scriptum est in linea numeri sunt minuta vierum. Etifas venominationes oftendunt tituli subscripti in pedeta bule. Et isto modo oportet te intrare vonec totus numerus compleatur. Et est fimilis modo operandi fere ficut in tabula voi querunt anni per 4 3 221. Et scias q vies sic inuenti sunt vies complete computate a meridie viei preceden, tis. Similiter et minuta vierum ze. funt completa: ficut anni menfes z figna. et omnia que inueniuntur in istis tabulis sunt completa. Quo facto dies et mi nuta vierum et ceteras fractiones: quas inuenisti per operationem: adde tem pozi cum quo quefiuisti mediam elongationem et quod post additionem pzo, uenit:erit tempus coniunctionis vel oppositionis medie. [Si ko habita con, iunctione volueris modo faciliozi inuenire oppositionem sequentem vel babi ta oppositione volueris confunctione sequentem (equale enim est tempus vtro, big)adde supra tempus quoduis istorum vies. 14. minuta vierum. 45. 2.55. 3.3. 4.48. (Si etiam quadraturas volueris inuenire: Adde supra tépus con iunctionis dies.7.minuta dierum. 22. 2.57. 3.31. 4.54.7 habebis quadratu ram primam. Adde illud idem supra tempus oppositionis: 2 babebis quadratu ram fecundam. C'Uel fi babita conjunctione polueris invenire conjunctionez immediate sequentem: Eldde supra tempus inventum confunctionis vies. 29. minuta vierum. 31. 2.50. 3.7. 4.36. Tantum enim est ab vna coninctione ad aliam Et ita babebis tempus coniunctionis vel oppositionis medium ad meri, DSi auté te in alio loco existente ad meridianu tuum velis dianum Toleti. reducere illud tempus: quia forfan alibi babitas. Lognosce tepus vistantie me, ridiani locitui a meridiano Toleti. Etfi meridianus locitui fuerit ozientalioz meridiano nostro: illud addas ad tempus coniunctionis z oppositionis zc.per noftras tabulas inventu. Si go occidentalioz: ipfum fubtrabes z babebis ipfas coniuctiones 2 oppositiones ad meridianu tue regionis.

Erum locum Solis z Lune boza medie coniunctionis cuiuscung et oppositionis inuenire. CScias argumentum Solis per. 15. et cum eo intra tabulam equationis Solis: z operare scom voctri nam. 16. cognitam. z babebis verum locum Solis. CIerum auté locum Lune babebis querendo argumentum Lune in tabula equation Lune. z in virecto inuenies equationem argumenti cum suis titulis adde vel minne: s cum argumento non sint minuta. Si vo cum argumento sint minuta: fac pzo illis partem proportionalem: pt victum est in. 11. banc equatio

nem adde vel sibtrabe scom quituli admonent: a medio motu. et prouent verne motus Lune. [] In tempore eni confunctions vel oppositions pracieda exquatione lune no ingredim cu eius centro: quia equatio centri nulla est. The cetiam accipimus oiner statem diametri circuli breuis: quia minuta proportionalia nulla sunt: sed tim cu equatione argumeti opamur. Et babebimo propositum.

Clodecimă partem distătie inter Solem z Lună inuenire; vt fieri opoztet in equando coniuctiones z oppositiones Solis z Lune ve ras. C Lu gradibo distantie eoz intra tabellă distătie primă zë. et ğ. z. m. ibi inueta extra nota. Deinde cu minutis distantie intra in tabellă secundă distătie zë, z qd ibi inueneris ex minutis z secudis sub pmis seribe. Q si in distantia suerint z intra tertio eande tabulă minutor. z qd ibi inueneris: sub pmis inuetis pone. ita ti q minuta sub secudis ponant. Qd po ex eoz aggregatioe puenerit: erit duodecima po distatie inter Sole Lună.

Otum Solis & Lune vinerfum in vno vie: vel in vno minuto viei vel in vna boza inuenire. Thuếto vero loco Solis z Lune; ve supra boza medie piúctionis vel oppositionis p scedenteia superioride differentia id est logitudine inter verum locum verius ita superioride differentia id est logitudine inter verum locum verius ita f. subtrabendo minozé a maiozi. z quod remanet est longitudo. Et vide cuius sit logitudo. est eni longitudo eius qui precesserit alterum in ordine fignoz:id est tunc talis longitudo est Solis:si Luna nondu consecuta est Solem in consuctione: vel nadir Solis in oppositioe. Tel est Lune:si Luna iam trăsuit Solem in piùctione: vel nadir Solis in oppositione. Il ac ergo logitudine serva. et scribe inta Logitudo Solis vel Lune: scom q oportet. Luiº logitudinis accipe duodecima parté : z ipsam eide logitudini adde. z illius totiº partiédo ipm in duo media accipe medietate: z ea cu argumeto medio Lune cu quo inuenisti eius veru locu adiuge: fi fuerit logitudo Solis. Clel ab eo minue: fi fuerit longi tudo Lune. et qo puenerit: erit argumentu Lune equatu pro inueniendo motu Lune equatu in vno minuto viei: vel in vna boza: fi volueris forte operari p bo raszc.et ferua ipfum. Deinde intra cu argumeto Solis in tabulam motus oi nerfi Solis in vno minuto viei: fi volueris operari p minuta vieru zë queredo figna in supiozi parte tabule trăsuersaliter: et gradus in linea longitudinali que vescédendo augmétant. Clel inferiori parte tabule etiá trasuersaliter z gradus in linea logitudinali que ascendendo augmentant. et quod in eius virecto inue neris de motu Solis diverso accipeth prescise potes eum invenire: quia est mo tus Solis in vno minuto viei equatus. Si po non prescise inuenias eum: fac partem proportionale per. 11. Deinde eodem modo intra cu argumento Lune cu suo addito seu viminuto servato: si prescise potes ipsum invenire. Si po non: fac parte proportionale: vt supra p. II et quod in eius virecto inuenies est motus Lune diverfus i vno minuto diei.
